

# INSPIRED BY NATURE: Habitats

For young adults age 9 - 12

**THE CAPE'S HABITATS** impact science, technology, art, music, history—every part of our daily existence. This summer, your child will explore the many habitats found right here in Falmouth and how they have influenced those who inhabit them.

We invite your child to engage their curiosity as the ***Cape Conservatory, Falmouth Art Center, Falmouth Museums on the Green, Falmouth Public Schools, National Oceanographic and Atmospheric Administration, and Salt Pond Areas Bird Sanctuaries, Inc.*** partner to explore the Cape's habitats.

Guided by teachers and local experts, your child will embark on a five-day hands-on adventure to understand the role and importance of **HABITATS** on our world and culture.

**Participating faculty: Corine Adams, Jeanne Stewart, Danielle Velesig, Cathy Henrich, Susan Jensen, Lindsey Sherman, Dr. Sofie Van Parijs, and Grace Simpkins**

Join us Monday, June 27 thru Friday, July 1, 9 am – 1 pm

Register early! Enrollment is limited to 25 students. \$150 per student
